Policies & Procedures Management – Regulated Environments

As a regulated business, you face an ever increasing volume of Regulations that you are required to adopt. Each new piece of Corporate Governance, Best Practice or Compliance Legislation forces businesses to review processes, in turn generating changes to Corporate Policies & Procedures.

Senior Management is required to disseminate the regulatory information in a timely manner, and communicate it to relevant employees. CONFORM™ provides you with the evidence of compliance and ensures that the recipients read and most importantly understand the content of the revised Policies.

The reputation of your organisation, risk of regulatory fines and personal liability of senior management depends on this process.

CONFORM automates the process of creation, review, dissemination, versioning, audited electronic delivery and understanding measurement of Corporate Policies & Procedures.

Receipt, read and (where appropriate) understanding through automatically scored online knowledge assessments ensures that the content has been understood. Real time auditing monitors all actions, and in the case of inaction, may trigger pre-defined escalation procedures.

CONFORM helps to reduce the risk of damage to reputation and financial loss; to provide evidence of Best Practice and Compliance; and to reduce costs.

Conform™ is the registered trademark of Hitec (Laboratories) Ltd.
